Title: ApnaSabji Order Flow Test Case Document **Version:** 1.0 **Author:** QA Team **Date:** June 30, 2025

---

1. Overview

This document outlines the functional test case for validating an end-to-end user flow on the ApnaSabji web application. The test case involves logging in, selecting a vegetable ("Potato"), adding it to the cart, and completing the order.

---

2. Test Case Details

Test Case ID: TC_E2E_001\ **Title:** Verify complete order placement flow for a vegetable (Potato)\ **Objective:** Validate the complete user journey from login to placing an order using valid data.\ **Preconditions:**

- User has internet access and a browser
- User has valid login credentials

Test Data:

- Username: pavan12345
- Password: 123456789\$Test&
- Product: Potato
- Quantity: 10
- City: Noida
- ZIP Code: 201301
- Phone: 9876543210
- Email: test@gmail.com

Test Steps:

Step No.	Action	Expected Result
1	Open `https://apnasabji.com`	Home page loads successfully
2	Click on **Login** at the top left	Login modal appears
3	Enter valid credentials and log in	User is redirected to the home page
4	Click on the **Veg** tab in the navigation menu	List of vegetables is displayed
5	Select **Potato**, enter quantity **10**, click **Add to Cart**	Potato is added to cart; cart icon updates
6	Click **View Cart**	Cart shows correct product and quantity
7	Click **Proceed to Checkout**	Billing & Shipping page is displayed

Step No.	Action	Expected Result
8	Fill all required billing & shipping fields:	Fields accept valid input
	- First Name	
	- Last Name	
	- Delivery Address	
	- Landmark	
	- City	
	- ZIP Code	
	- Phone Number	
	- Email Address	
	- Delivery Slot	
9	(Optional) Add order notes	Notes field accepts input
10	Click **Place Order**	Confirmation message or order ID is displayed
11	(Optional) Check email/SMS for confirmation	Confirmation received

Expected Result: User should be able to complete the order for 10 Potatoes successfully with confirmation displayed.

3. Negative Test Considerations

- Leave required fields empty → Validation messages shown
- Enter invalid email or phone → Error messages shown
- Try placing order with zero quantity → Cart prevents progression

4. Acceptance Criteria

- All steps are executed without error.
- Validation messages appear for incorrect inputs.
- Order placed and confirmation received.
